Introduction

Welcome

This is the installation guide and user manual for the Wishlist Member add-on for Rapid Action Profits (RAP). This add-on integrates both products together. By itself, Wishlist Member is an awesome membership plug-in for Wordpress. And by itself it can handle multiple payment systems to support payment processing.

What Wishlist member is lacking is what RAP excels at. The affiliate marketing, split testing, affiliate payment system, etc.

By integrating the two systems together you get all of the benefits that RAP provides for managing your affiliates, split tests, payment, etc. and all of the benefits that Wishlist Member provides for a membership site that is run from within Wordpress.

This add-on provides for a quick and easy way to integrate Wishlist Member with RAP. It only takes a few clicks to get them working together.

Installation

Downloading

Well, if you are reading this then you probably already figured out how to download the files that are needed. However, just a reminder, you were provided the opportunity to download the software when you purchased the add-on. You were also added to a membership based site so that you can download the latest files at any time. To access this site simply go to rap-tools.com/members. If you have purchased multiple products from us then you will have access to the latest files for all of the products that you have purchased from this site.

Unpacking

When you download the zip that contains all of the files you will have a main directory called gis-plugins. Inside of that folder you will find the install.txt file that is the text version of this chapter with installation instructions. You will also find a directory called GIS. Inside of GIS is a directory called WishlistMember.

Uploading

It is important to understand how RAP needs to see add-ons for them to work properly. Every add-on needs to be placed in a special directory under the rap_admin directory. You need to upload the files for the Wishlist Member add-on to these directories.

Under the rap_admin directory there is a directory called addons. Inside of addons there is a directory for every company that makes an add-on and inside of each of those folders is a folder for each add-on.

So the contents that are in GIS/WishlistMember in the archive file need to go into the rap_admin/addons/GIS/WishlistMember directory in your installation of RAP.

I am assuming that you already have the knowledge on how to upload the files to your site.

First Run

After you copy the files to your RAP installation you need to activate the plugin. If you are already logged in to your rap_admin interface, you need to log out and log back in. If you are not in, log in to your rap_admin interface.

Go to the add-ons menu, you should see the Wishlist Member add-on in the list now but it will be red telling you that it has not been activated yet. To activate it, simply select the red Wishlist Member option in the menu. When you select it, the add-on will activate itself and install the tables that are used by the Wishlist Member add-on. This will happen very quickly. When it is complete, there will be a link at the bottom that you can click to go to the Wishlist Member interface.

You can also at any time now go to the add-on menu and select Wishlist Member to access the Wishlist Member administration interface.

Important Note: If you have also purchased the editor add-on from rap-tools.com, be sure to install that add-on first. If Wishlist Member sees that add-on it will install the tokens that are available for the Wishlist Member add-on.

How To Use

Accessing the Wishlist Member Administrative Interface

After the Wishlist Member add-on is installed you can access it any time by going to the add-ons menu and selecting Wishlist Member.

Wishlist Member Options

Before you can set any options for Wishlist Member you need to select a product. If you have not yet selected a product before going to the Wishlist Member add-on, you will be prompted to select one. You can select one from the list presented to you.

Product Options

This section contains the 3 fields that are necessary to integrate RAP and Wishlist Member together. The 3 pieces of information that is needed are:

- Post URL
- Secret Word
- SKU

Product Options

Post URL:
Secret Word:
SKU:

Save

All of the above information comes from within the

Wishlist Member plugin in Wordpress. These options need to be set for every product that will create a new membership within Wishlist Member.

Here are the steps to getting the information from Wishlist Member that is needed:

1. Login to the wordpress admin for your Wishlist Membership site.
2. Go to the WishList Member Section and click on the Integration Tab at the Top.

Levels Sequential Upgrade **Integration**

3. After you are in the Integration tab, be sure you are on the Shopping Cart and not AutoResponder integration section.

Shopping Cart **AutoResponder**

4. Select "Generic System" in the "Select System" Dropdown box.

Shopping Cart Integration

Select System

Generic System ▼

5. After you select Generic System you will see a section titled Post URL. Highlight and copy this URL into the Post URL field in the Wishlist Member addon settings.

Post URL

The Post URL is where you send your information to.

<http://www.growyourbusinessonthenet.com/members/index.php/register/Vds347> (change)

6. Look for the Secret Word Section, highlight and copy the text in the secret word field and paste it into the Secret Word Field in the Wishlist Member addon settings.

Secret Word

The Secret Word is used to generate a hash key for security purposes.

7. Now you need to find in the list of Membership Level SKU's the membership level that is associated with this product. To the right of the membership level is a number called a sku. Highlight the sku for the membership level for this product, copy it and then paste it into the SKU field in the Wishlist Member addon settings.

Membership Level SKUs

The Membership Level SKUs specifies the membership level that should be tied to each transaction.

Membership Level	SKU
FREE Trial	<u>1256849143</u>
Week-2	<u>1256849211</u>
Week-3	<u>1256849237</u>

8. Complete the above steps for every product that has a membership associated with it.

Inserting the Token

The Token

```
<?=Wishlist_Register() ?>
```

Description

The last step that is needed is to insert the Token into your download, squeeze, comp, etc. The token for the Wishlist Member works just like other RAP tokens. The token returns the url of the page to complete the registration. So if you want to have a link for your customer to click to complete the registration process you need to use the token like this: `<a href="<?=Wishlist_Register() ?>">Your Text Here`.

This add-on does a lot behind the scenes before it gives you that link. And even if your customer does not follow the link their account is setup but is missing a few details. When they attempt to login they will get prompted for the information. The link is just a speedier more direct way to complete the registration process with the extra details.

Updates

Your Version and the most recent Version

When you first start up the Wishlist Member add-on, you can see your current version and the most recent version information right at the top under the name of the add-on.

Getting the latest version

You can go to rap-tools.com/members and login with the account information you setup when you purchased the Wishlist Member add-on. You can get access to the latest version at any time here.

Support

You can get email support at askmikemyers.com. For your convenience there is a link to the support center right on the Wishlist Member add-on page.
